

TRANSPORTATION & GOODS MOVEMENT COUNCIL

CHAMBER CONTACT:

Elissa Diaz
Senior Policy Manager
Public Policy & Advocacy
EDiaz@lachamber.com

The Los Angeles Area Chamber of Commerce believes in **“A Thriving Region for All”** and a **“Balanced Approach”** to decision-making and that **“Business is a Force for Good.”**

We design and advance opportunities and solutions for a thriving regional economy that is balanced, inclusive, and globally competitive.

TRANSPORTATION & GOODS MOVEMENT

The Transportation & Goods Movement Council addresses all issues related to our region’s mobility — highway, rail, air, shipping, transit, cycling, walking, roads and arterials. The council advocates for federal, state, and local policies and programs that provide system-wide and regional solutions that promote equity through transportation. The council also emphasizes the importance of transportation and goods movement to the region and nation’s economies, while encouraging balanced approaches to improving environmental sustainability.

Support Investment in Sustainable Goods Movement Infrastructure at the Ports and Along Goods Movement Corridors

Support the expansion and improvement of goods movement infrastructure and systems. Goods movement is the engine of the Southern California’s economy and supports the funding sources necessary for all modes of transportation.

- Lead and coordinate efforts at local, state, and federal levels for the funding and implementation of critical projects.
- Advocate for smart regulations that facilitate the effective and efficient movement of goods through our ports, such as zero-emissions trucks, charging and fueling infrastructure, and grid enhancements to ensure long-term reliability.
- Convene and work with policymakers and stakeholders on efforts to find a sensible and reasonable solution for the future of the I-710 corridor, taking into account the growth of goods movement while ensuring equitable opportunities and outcomes for communities along the corridor.

Support Continued Investments in our Region’s Vast Infrastructure Network in Preparation for the 2028 Olympics

The historic investments provided by the federal Infrastructure Investment and Jobs Act (IIJA) provide a once-in-a-generation opportunity to rebuild Los Angeles into a world-class region. The Chamber will be a leader in building consensus among policymakers and stakeholders to ensure projects are built in a timely and cost-effective manner.

- Work with local agencies and elected partners to advocate for the region to secure its fair share of funding for new and ongoing projects while engaging our membership in the procurement process and other related business opportunities.
- Advocate for policies that streamline the permitting process, including CEQA reform, and lead to accelerated delivery of planned transportation projects. The Chamber will coordinate and lead efforts with public and private sector partners from project initiation through ribbon cutting.
- Build off past successes and plan a 2026 IIJA reauthorization strategy with partners and stakeholders.

Advocate for Sensible Environmental and Sustainability Policies that Promote Emissions Reductions While Promoting Economic Growth

One of our region's key competitive edges is its two ports — the Ports of Los Angeles and Long Beach. Their modernization and efficient operation are essential to maintaining our competitiveness on a global scale. Investment in both the federal and state freight plans will bolster our edge.

- Advocate for reasonable, cost-effective, and technology-neutral air quality regulations for the transportation sector, and ensure that regulations balance the environmental and economic needs of the South Coast Air Basin.
- Advocate and propose legislation and programs aimed at increasing zero-emission vehicles (ZEV) and ZEV infrastructure — including large commercial trucks and cargo handling equipment — across the region and country to reduce greenhouse gases from the transportation sector.

Support Expanding and Improving Southern California's Multi-modal Transportation Systems

The region's network of roads, transit lines, commuter rail, goods movement corridors, and ports of entry (both air and sea) provide the mobility and accessibility foundation to support the region's economy.

- Support transportation policies at all levels of government to increase mobility, relieve congestion, and expand alternative commute options.
- Work with local agencies and policymakers to identify opportunities for improving the safety and security of our region's transportation network.
- Promote equity in the implementation of the IIJA with a focus on providing opportunities for historically disadvantaged businesses to participate in the IIJA and other publicly-funded projects.

TRANSPORTATION AND GOODS MOVEMENT COUNCIL LEADERSHIP

CHAIR

Steve Finnegan
Automobile Club of Southern California

CO-CHAIR

Steve Agor
Skanska

CO-CHAIR

Fran Inman
Majestic Realty Co.

CO-CHAIR

Larry Jacobs
Shell Energy Corporation

CO-CHAIR

Artie Mandel
Port of Los Angeles

CO-CHAIR

Hilary Norton
FAST— Fixing Angelenos Stuck in Traffic
