LOS ANGELES AREA
CHAMBER OF COMMERCE

Jeanne Holm

Chief Data Officer and Senior Technology Advisor
City of Los Angeles, Office of Mayor Eric Garcetti

As a leader in open data, education, and civic innovation, Jeanne Holm empowers people to discover new knowledge and collaborate to improve life on Earth and beyond. Jeanne is the Chief Data Officer and Senior Technology Advisor to the Mayor at the City of Los Angeles, helping 4,000,000 people and 500,000 businesses get access to and use data for innovation, equity, health and safety. She connects public-private partners for innovations ranging from digital equity to 5G.

She was the Deputy CIO at the City delivering 311, public television and digital media, and ShakeAlertLA. She founded the Data Science Federation partnering universities and cities to create innovative solutions such as using artificial intelligence for traffic safety and machine learning to improve air quality. She was formerly the Evangelist for open data for the White House under President Obama, the leader for Africa open data for the World Bank, and the Chief Knowledge Architect at NASA. She is a Distinguished Instructor at UCLA, a Trustee of Claremont Graduate University, a Fellow of the United Nations International Academy of Astronautics, and advisor to the UN's Sustainable Development Solutions Network. She leads a startup that promotes equity, education, and social justice through technology and education programs for innovators throughout the world.
