Christopher Cannon
Director of Environmental Management
Port of Los Angeles

Christopher Cannon is the director of environmental management for the Port of Los Angeles, a position he has held since October 2010.

Cannon has worked at the Port of Los Angeles as a consultant since 2004, most recently helping to manage the implementation and daily operation of the highly successful Clean Truck Program.

In his new role, Cannon will be responsible for balancing commerce and growth with ecological sustainability at the nation’s busiest container port. The division assesses environmental impacts of development projects and determines appropriate mitigation measures. It also prepares and distributes any environmental documentation mandated by state and federal law; special studies involving dredging, noise abatement, water quality and air quality; contamination characterizations; wildlife management; and establishment of policies regarding environmental quality issues.

Before his work on the Clean Truck Program, Cannon worked with the Port Environmental Management Division’s Air Quality and CEQA groups, supporting the development of key air projects such as the Clean Air Action Plan and its efforts to complete critical environmental impact reports for Port-related projects. Cannon has 21 years of experience in the environmental services industry, working on a range of projects while employed by ENVIRON International Corporation and TRC Environmental Solutions.

Cannon also spent two years as a legislative assistant for environmental policy on the Washington, D.C. staff of U.S. Representative Martin Sabo of Minnesota.

Cannon received a bachelor’s degree in international relations from Dartmouth College and a law degree from University of California at Berkeley’s Boalt Hall School of Law. He currently lives in Los Angeles.
JOBS • BUSINESS • ECONOMY • NOW
