Karma Automotive is a Southern California high-tech incubator and creator of luxury electric vehicles that is driven in part by the combination of innovative technology and lifestyle. As we look to define the next generation of mobility experiences, it is important that we explore how the arrival of 5G technology will impact our world.

Please join us for a day of engaging discussion with academic and industry experts as we take a deeper look into the potential of 5G and its impact on mobility.

The conference will feature a keynote address by Mischa Doehler, Professor of Wireless Communications at King’s College London and Fellow of the IEEE, the Royal Academy of Engineering, the Royal Society of Arts (RSA), the Institution of Engineering and Technology (IET), and a Distinguished Member of Leaders Excellence at Harvard Square. The keynote will be followed by panel discussions, Q&A, and networking with attendees and speakers from UCLA, UCSD, and Ericsson, among others.

A continental breakfast and full lunch will be provided.

PLEASE RSVP BY FRIDAY, SEPTEMBER 6, 2019
