LOS ANGELES BUSINESS COUNCIL PRESENTS
THE 14TH ANNUAL SUSTAINABILITY SUMMIT:
Advancing the Well-Being of Communities

Friday, March 27 - 7:30am – 3:30pm
Bovard Auditorium | University of Southern California

The Los Angeles Business Council is pleased to announce we will be hosting our 14th Annual Sustainability Summit in partnership with the University of Southern California’s Sol Price School of Public Policy and the Schwarzenegger Institute for State and Global Policy. This year’s summit will focus on the urgent need to recommit to international climate goals ahead of the United Nation’s Climate Change Conference COP26 in Glasgow later this year, and how the State of California and municipalities pursue aggressive climate targets to benefit the well-being and resiliency of communities in lieu of federal support.
