

For almost 60 years, St. John's Well Child & Family Center has been providing quality health care to the communities of South Los Angeles. As the first organization to offer the COVID-19 vaccine in South L.A., St. John's has vaccinated 275,000 people! COVID-19 has destroyed many families and our community was hit harder than most. With the new Delta variant spreading quickly, we must act NOW to protect ourselves from this deadly virus.

## Join Us!
